PROFESSIONAL SUMMARY

Finance professional with **5+ years of experience** in financial controllership, FP&A, and data analytics — including 4 years at **Fortune 500 company Aon**. I have hands-on experience across the full finance cycle: variance analysis, budgeting, forecasting, month-end close, and ERP systems (Workday, PeopleSoft, Coupa).

I hold an **MSc in Financial Data Science from UCD Smurfit Business School** and am an **Associate of CPA Australia (ASA)** with 6 exemptions, currently working toward full CPA certification. I am comfortable working with data — Power BI, Excel, and Python — and have a track record of turning financial data into clear, useful reporting for senior stakeholders.

SKILLS

Finance	FP&A · Variance Analysis · Budgeting & Forecasting · Financial Modelling · Month-End Close · P2P · R2R · Stakeholder Reporting
ERP & Systems	Workday · PeopleSoft · Coupa · Microsoft 365
Analytics	Power BI · Advanced Excel · Power Query · Python (Pandas, Matplotlib) · SQL (working knowledge)
Soft Skills	Team Leadership (12 staff) · Cross-functional Collaboration · Board-level Communication · Process Improvement

PROFESSIONAL EXPERIENCE

Analyst — Finance Controllership

Oct 2018 – May 2022

Aon (Fortune 500 · Global Professional Services) | Gurugram, India

Started as a Financial Associate and worked my way up to Financial Analyst over 4 years at Aon. My work covered financial reporting, variance analysis, and audit across P2P and R2R — along with a major ERP migration and several process automation projects.

Financial Reporting & Variance Analysis

- Ran monthly variance analysis across vendor provisions and department cost centres — tracked down discrepancies, wrote commentary, and presented findings to senior finance leadership
- Prepared month-end journals and reconciliations across multiple business units, consistently hitting reporting deadlines
- Reclassified expenses to the correct cost centres and general ledgers to keep financial reporting accurate and IFRS-compliant
- Audited vendor payment data through the P2P cycle — cut down processing errors and improved overall payment accuracy

Process Automation & Efficiency

- Built an automated Amex delinquency tracker in Excel that saved the team around 1.5 hours of manual work every day
- Created a single consolidated expense file used across the auditing team — boosted team accuracy by 7% in the first quarter
- Led the ERP migration from PeopleSoft to Workday — worked across finance, IT, and operations to keep financial controls running throughout the transition

Governance & Team Capability

- Wrote Employee Job Aid documentation covering reimbursements, tax policy, and key finance contacts — became the go-to reference across the Aon finance team
- Brought on and mentored new finance analysts — ran knowledge-sharing sessions after major projects

Head of Analytics *May 2022 – Jun 2023*
AnujJindal.in | Delhi, India

Built the analytics function from scratch — hired and managed a team of 12, set up reporting workflows, and worked across financial governance, pricing, and operational performance.

- Grew the team from zero to 12 people — set up the processes, reporting structure, and ways of working from day one
- Built financial dashboards tracking budget vs actuals, cost efficiency, and revenue — the work contributed to a **5.6% increase in company revenue**
- Advised on inventory auditing, pricing decisions, and budget planning for senior leadership
- Built content and audience performance dashboards that helped drive around **103% growth in YouTube reach** through data-informed decisions

EDUCATION

MSc Financial Data Science | Grade: 2:1 *2023 – 2024*
UCD Smurfit Business School (University College Dublin) | Ireland

- **Key Modules:** Financial Analysis, Financial Econometrics, Machine Learning for Finance, Python for Financial Data Science, Derivative Securities, Banking in the Digital Age
